

Career Objective:

- ✚ To be an integral part of an organization where I can apply my expertise, embrace new challenges, and contribute to the successful development and implementation of cutting-edge technological solutions.

Educational Credentials:

- ✚ B. Tech. in Computer Science and Engineering- **Amity University, MH-India**, CGPA: 7.40
(June 2021- June 2025)

Main coursework:

- ✚ Data Structures, Design and analysis of Algorithms, Distributed Algorithms, Machine Learning, Database Systems, Operating Systems, Software Engineering.

Project Works:

✚ Birdcall Recognition: EDA and Audio Feature Engineering: -

- Worked on a project focused on recognizing bird species from audio recordings using exploratory data analysis (EDA) and audio feature engineering techniques. Extracted meaningful features such as MFCCs, Chroma, Spectral Centroid, and Zero-Crossing Rate using LibROSA.
- Conducted in-depth EDA to understand audio patterns, noise levels, and class distribution. Prepared clean, labeled datasets suitable for machine learning models. This project laid the foundation for building an accurate birdcall classification system.

✚ Stock Prediction of Apple Company:

- Created a stock prediction project for Apple Inc. using Python, machine learning, and data visualization tools. Utilized historical data to forecast stock trends with models like Linear Regression.
- Focused on data preprocessing, model training, and presenting insights through graphs for better analysis and prediction accuracy.

Research Publication:

✚ Malware Detection Using Machine Learning: -

- Co-authored a research publication on Malware Detection using a hybrid Machine Learning model, under the mentorship of Dr. Rajiv Iyer.
- Collaborated in a group to design, develop, and test a custom hybrid model for improved accuracy in detecting malware, combining multiple ML techniques for enhanced performance.

Core Technologies (Skills):

- **Programming Languages** - Python, Java, SQL, R, HTML, CSS, JavaScript
- **Operating System** - Windows, Mac OS, Linux
- **Database** - MySQL, MongoDB
- **Frameworks and tools** -Jupyter Notebook, Google Colab, Tableau, Power BI
- **Libraries** - Pandas, Matplotlib, NumPy, Seaborn
- **Others** - GitHub & Git

Training & Experience:

IEEE Summer Intern (Online)

Summer 2022

 **Role:** Group Leader | Team Size: 4

- Led a team of 4 members in developing a full stack web application as part of an IEEE summer internship program. Oversaw project planning, task distribution, and weekly progress reviews. Utilized technologies such as HTML, CSS, JavaScript, React (frontend), Node.js/Express (backend), and MongoDB (database).
- Ensured seamless team collaboration using Git and deployed the final product on a cloud platform. Gained hands-on experience in agile development, version control, and full-cycle web development.

LOGINIUS INFOTECH, Rajkot-India

July 2024 - Aug 2024

 **Role:** PHP Developer

- Completed a hands-on internship focused on backend web development using PHP. Contributed to the development and maintenance of dynamic web pages, handled form validations, and integrated MySQL databases for data storage and retrieval.
- Gained practical experience in writing clean, modular PHP code and working within existing codebases. Collaborated with senior developers to understand real-world web application requirements and enhance performance and functionality. Also learned basic front-end integrations using HTML, CSS, and JavaScript.

Air contact Systems Pvt Ltd, Hyderabad-India

July 2025- Nov2025

 **Role:** Software Development Professional

- Developing website UI using JavaScript+ XML
- Working on backend part of website using Python.
- Coordinating with team members on various concerns and value addition ongoing projects.

Innodata INC., Noida-India

February 2026 - May 2026

 **Role:** AI/LLM Analysts (WFH)

- Worked on AI and Large Language Model (LLM) evaluation, data annotation, and quality analysis projects to improve model accuracy and performance.
- Reviewed and analysed AI-generated responses for factual correctness, contextual relevance, language quality, and compliance with project guidelines.
- Performed prompt-response evaluation, structured annotation, and data validation tasks for machine learning and NLP workflows.
- Identified inconsistencies, hallucinations, and formatting issues in AI outputs and provided detailed feedback for quality improvement.
- Collaborated with reviewers and team leads to maintain high-quality standards and achieve project delivery targets within deadlines.
- Gained practical exposure to Generative AI, prompt engineering, LLM evaluation methodologies, and data quality assurance processes.
- Managed multiple AI assessment tasks efficiently while maintaining productivity and accuracy benchmarks.

Certification in Courses:

- ✚ Accenture North America Data Analytics and Visualization Job Simulation on Forage_ (April 2025)
- ✚ Tata Data Visualization: Empowering Business with Effective Insights Job Simulation on Forage_ (April 2025)
- ✚ BCG Data Science Job Simulation on Forage_ (April 2025)
- ✚ Google Data Analytics Professional Certificate_ (Dec 2024)
- ✚ IBM Data Science Professional Certificate_ (Dec 2024)

Hobbies:

- ✚ Photography, Music, Movies

Best of,
Sujal Donga
